14. Do you agree or disagree with each of the following statements? Here's the first one ...

	<u>ASt</u>	<u>ASo</u>	<u>DSo</u>	<u>DSt</u>	<u>DK / RF</u>
a. When it comes to controlling costs and operating efficiently, the Hilliard Schools are getting better	7%	35%	28%	19%	11%
b. To continue providing a quality education, the Hilliard Schools will need another levy during the next two years	10%	19%	21%	41%	9%
c. Considering the education students receive, taxes paid to the Hilliard Schools is money well spent	28%	40%	15%	12%	5%
d. The Hilliard Schools offer more services and programs than students need for a quality education; they'd be just as prepared for college and for life if the schools scaled back	17%	18%	23%	36%	6%
e. The Hilliard Schools could reduce spending significantly without lowering the quality of education the district provides	35%	25%	20%	15%	5%
f. District officials are well on their way to keeping the promises they made when voters were asked to approve an operating levy last November	9%	42%	19%	12%	18%
g. The Hilliard Schools are doing a better job communicating with the community than they have in the past	15%	37%	23%	12%	13%

15. When the operating levy for the Hilliard Schools passed last November, school officials said that another levy would be needed in 2010 – even if cuts in spending were made. As 2010 approaches, what should the district do: Put a levy on the ballot because there is still a need for additional money or push the levy back a year, to 2011, even if doing so results in additional cuts to the programs and services the district provides?

- 32% Put levy on ballot in 2010
- 60% Push the levy back a year
- 8% DK / RF / Other

16. To what extent would each of the following persuade you that, when a levy is on the ballot, the district needs the additional money. How about this ...

a. The district’s Audit and Accountability Committee, after an in-depth study, concludes that additional money is needed, despite the numerous cuts the district has made	8%	40%	24%	26%	2%

17. To make the levy last November more affordable for residents, the district reduced the size of the tax increase by lowering the millage – in other words, by asking for less money than it really needed. At that time, the district told the community that another levy would be needed in 2010 to make up the difference. Now, does knowing this make you more likely or less likely to support a request for more money, or doesn't it matter?

- 21% More likely
- 25% Less likely
- 52% Doesn't matter
- 2% DK / RF

18. As you probably know, the Hilliard Schools have asked voters for more money on several occasions over the past ten years. 24. In 2010, the district's operating expenses will grow by nine-point-one million dollars. More than 80 percent of that growth comes from the salaries and benefits paid to teachers, administrators, and staff. Question 16(e): Persuasive that the district needs additional money: The district adopts a more serious effort to limit residential growth -- and, in turn, the number of new students the district must serve.

The 2009 Hilliard City Schools Issues Survey

Question 17: To make the levy last November more affordable for residents, the district reduced the size of the tax increase by lowering the millage -- in other words, by asking for less money than it really needed. At that time, the district told the community that another levy would be needed in 2010 to make up the difference. Does knowing this make you more likely or less likely to support a request for more money, or doesn't it matter?

Question 28: Another provision of the Governor's plan calls for smaller classes in Grades K to 3: fewer than 20 children by 2010-2011 and fewer than 16 children the year after. Currently, the average K-3 class in the Hilliard Schools has 23 children. If the state provides no additional money for the teachers and classrooms this change would require, would you favor or oppose these smaller classes?

c. The district stretches the current levy for an extra year	1	2	3	4	5
d. The district continues to receive from the state a rating of excellent with distinction	1	2	3	4	5
e. The district adopts a more serious effort to limit residential growth – and, in turn, the number of new students the district must serve	1	2	3	4	5

17. To make the levy last November more affordable for residents, the district reduced the size of the tax increase by lowering the millage – in other words, by asking for less money than it really needed. At that time, the district told the community that another levy would be needed in 2010 to make up the difference. Now, does knowing this make you more likely or less likely to support a request for more money, or doesn't it matter?

1. More likely
2. Less likely
3. Doesn't matter

More than 80 percent of that growth comes from the salaries and benefits paid to teachers, administrators, and staff. 1. More likely
2. Less likely
3. No difference
